George Glass (Olta Vangjeli)	TM Forum

Active maintainer representatives  
(no stand-ins possible)

EUC representatives  
(no stand-ins possible)

GSMA & TM Forum representatives

# New CAMARA governance

## New EUC

**CAMARA**  
THE TELCO GLOBAL API ALLIANCE

Doug Makishima	(Summit Tech)
Massimiliano Troiani	(Verizon Sales)
Julian McCrea	(Open Sesame)
Mateusz Mul	(Open Sesame)
Andrew Wajs	(Scenera)
Adnan Saleem	(Radisys)
Yong Xin	(Radisys)

# New CAMARA governance

## Onboarding of individuals

**CAMARA**  
THE TELCO GLOBAL API ALLIANCE

- Individual has to sign the CLA (LF EasyCLA)
- Individual has to be added to the participant list (Individual - company - role - email - GitHubID)
- Individual has to join GitHub and the GitHub "all" group (by that she/he becomes collaborators in each repo)
- Individual has to be added to the (main and) "all" mailing list
- Individual has to get the invitation to the All-Hands-Call

→ Should be 1 transaction...

LF is asked  
For a solution

# New CAMARA governance Fund project

Application for CAMARA Fund is in progress:

- If you're interested please follow the enrollment link
- <https://enrollment.lfx.linuxfoundation.org/?project=camarafund>

Deadline 15.08.2023  
to be part of the press release

Details you can find here:

- <https://github.com/camaraproject/Governance/blob/main/CAMARA%20Fund%20Participation%20Agreement%20and%20Funding%20Charter.pdf>
- <https://github.com/camaraproject/Governance/blob/main/documentation/MeetingMinutes/CAMARA%20Project%20-%20SteeringCommittee%20-%202023-06-15.pdf>

# New CAMARA governance Commonalities

„Commonalities“ split in 3 instances:

- [Commonalities Working Group](#)
  - Merged urgent PRs and transferred the remaining open issues to new repository
- [Commonalities Sub Project](#)
  - Housekeeping activities to setup the new repository. Release to be planned soon.
  - Work ongoing to close open issues with relevant PRs
- [Identity and Consent Management Sub Project](#)
  - Update AuthN-AuthZ flows to incorporate consent
  - PR to document consent related use cases
  - Open issues to clarify subset of topics mentioned in the base consent doc.

# Updates from Sub Projects and Working Groups (1)

- Edge Cloud [Cristina]
  - Traffic Influence: Final alignment with guidelines and documentation improved for R0.9.1. Working on testing cases.
  - Edge Selection: Finally, we have agreed on the first version of the edge selection API. Right now, working on the alignment of this API with guidelines and commonalities. In parallel we continue working in the following harmonization between the different contributions to create the second version of the API.
- Device Location [Jose Luis]
  - Existing API renamed to location-verification, new release v0.2 almost ready. Agreed to add 2 new APIs to the family: location, for retrieval of raw location, and location-verification-subscription (name tbd), to add geofencing functionality (events when devices enter or exit certain area).
- Carrier Billing Checkout [Pedro]
  - Agreement reached between Orange and Telefonica to move forward with a common proposal. Rationale in Issues #79 <https://github.com/camaraproject/CarrierBillingCheckOut/issues/79> and #87 <https://github.com/camaraproject/CarrierBillingCheckOut/issues/87>. Baseline proposal to be merged during first-half of July.

# Updates from Sub Projects and Working Groups (2)

- [Blockchain Public Adress \[Pedro\]](#)
  - Sub-Project created in Mid-June, upon proposal approval. Currently managing logistics of the Sub-Project and settled Kick-Off meeting on 6th July to manage Sub-Project stuff and present Use Cases and initial API propos
- [Home Devices QoD \[Jesús\]](#)
  - Generation of the release v0.2.0. There is no further functionality to add in the current v0.2.0 API state. From release v0.2.0, work will begin to generate the first stable API version v1.0.0 as per <https://github.com/camaraproject/HomeDevicesQoD/issues/39> by contributing with the API test cases definition.
- [API backlog \[Jose Antonio\]](#)
  - Awaiting drop from GSMA Open Gateway Product workstream by mid July
  - API owners to update the status in API backlog:  
<https://github.com/camaraproject/WorkingGroups/blob/main/APIBacklog/documentation/APIBacklog.md>

# Updates from Sub Projects and Working Groups (3)

- **Quality on Demand**
  - Release candidate of v0.9.0 available, one PR outstanding before release is ready
  - Main changes compared to v0.8.x
    - Added new methods to get service provider defined QoS Profiles
    - Updated method for identifying devices by IPv4 address
    - Introduced qosStatus and corresponding notification event
    - Renamed properties to new terms agreed in CAMARA Commonalities
    - Reworked notifications and events according to CAMARA Design Guidelines
    - Documentation is now embedded within the OAS definition
- **Device Identifier**
  - Draft version 0.0.3 available; Documentation added to API definition; No releases yet, waiting for input from Identity & Consent Management

# Updates from Sub Projects and Working Groups (4)

- Marketing Working Group
  - o OAGS 2023
