## CAMARA website available

The screenshot shows the top section of the CAMARA website. At the top is a dark blue banner with the word "CAMARA" in large white letters and "The Telco Global API Alliance" in smaller white letters below it. Below the banner is a navigation bar with a light blue background and dark blue text. The navigation bar contains the following links: "Vision", "5G network capabilities", "API Architecture", "Distribution options", "Availability", "Mission", "Scope", and "Logos". Below the navigation bar is a section titled "Vision" in blue text. The "Vision" section contains the following text: "4G/5G network capabilities exposed through APIs provide a large benefit for customers. By hiding telco complexity behind APIs and making the APIs available across telco networks and countries, CAMARA enables an easy and seamless access." Below this text is a paragraph of further information: "Further information incl. API descriptions, code and documentation you can find on <https://github.com/camaraproject>. Here you can also download the [CAMARA Onepager](#) and the [CAMARA presentation](#). If you want to get in contact or to participate in CAMARA you can send an e-mail to [CAMARA Mailbox](#)." At the bottom of the screenshot is a footer section with the following text: "Copyright © Camara Project a Series of LF Projects, LLC. A large, diagonal watermark is overlaid on the right side of the screenshot, reading "Will be professionally revised by LinuxFoundation".

### Vision

4G/5G network capabilities exposed through APIs provide a large benefit for customers. By hiding telco complexity behind APIs and making the APIs available across telco networks and countries, CAMARA enables an easy and seamless access.

Further information incl. API descriptions, code and documentation you can find on <https://github.com/camaraproject>. Here you can also download the [CAMARA Onepager](#) and the [CAMARA presentation](#). If you want to get in contact or to participate in CAMARA you can send an e-mail to [CAMARA Mailbox](#).

## CAMARA mailing list

Currently a mailing list for CAMARA doesn't exist. GitHub functions are not sufficient. Shall CAMARA use one of the free email services?

- Check if joint solution with GSMA is possible
- Check free email service options
- Present solution in next steering committee to decide

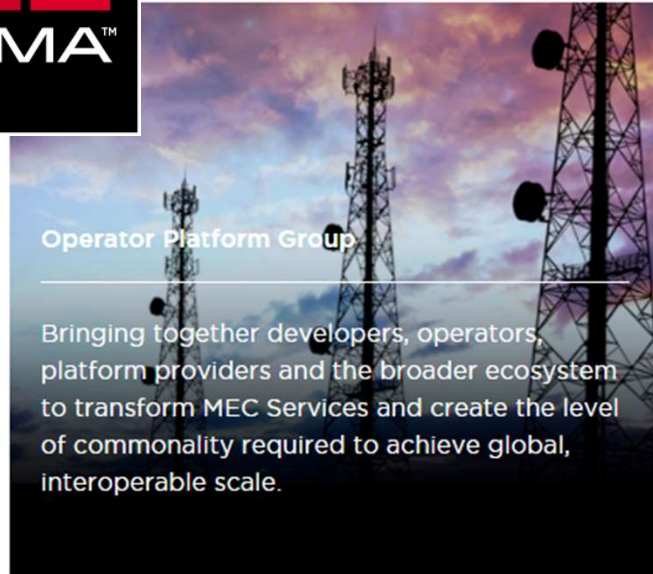

LinuxFoundation provides a free solution for CAMARA (LFX platform)
