

SCENERA

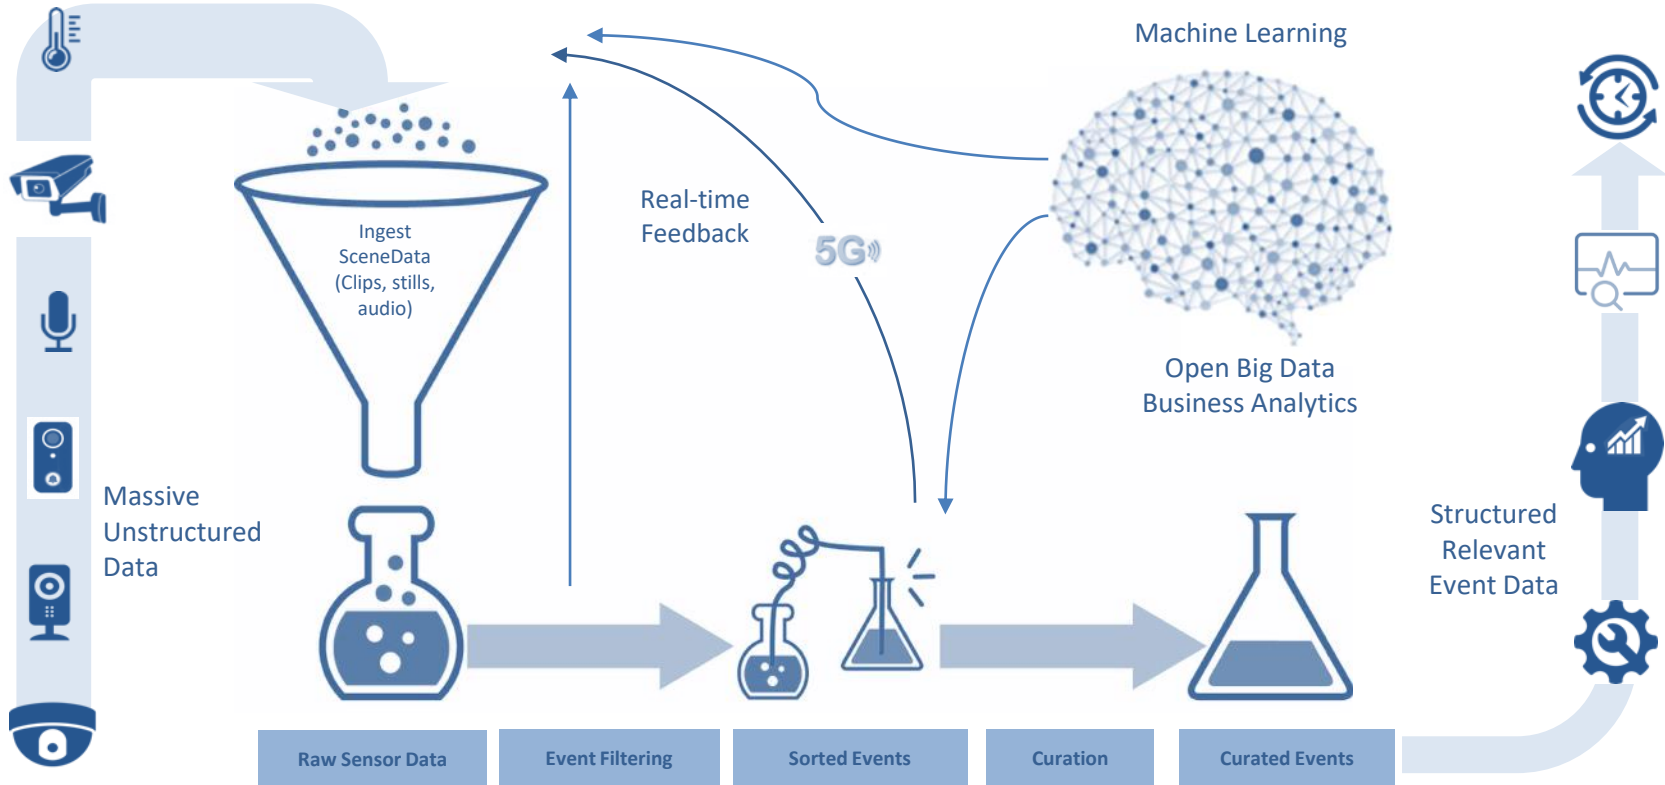

Scenera

The Leader in Orchestration of Event Recognition

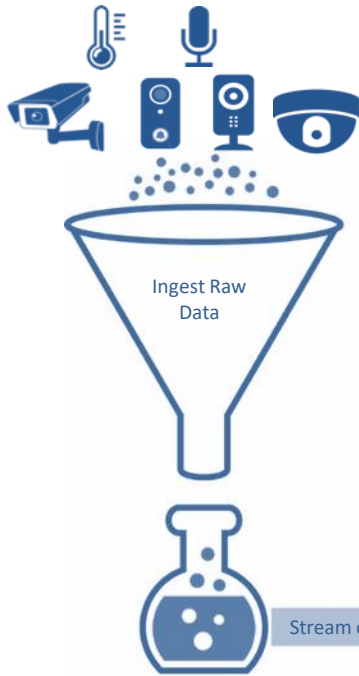

Customer Problems – How to capture the right events?

Increasing Number of Sensors

Applications

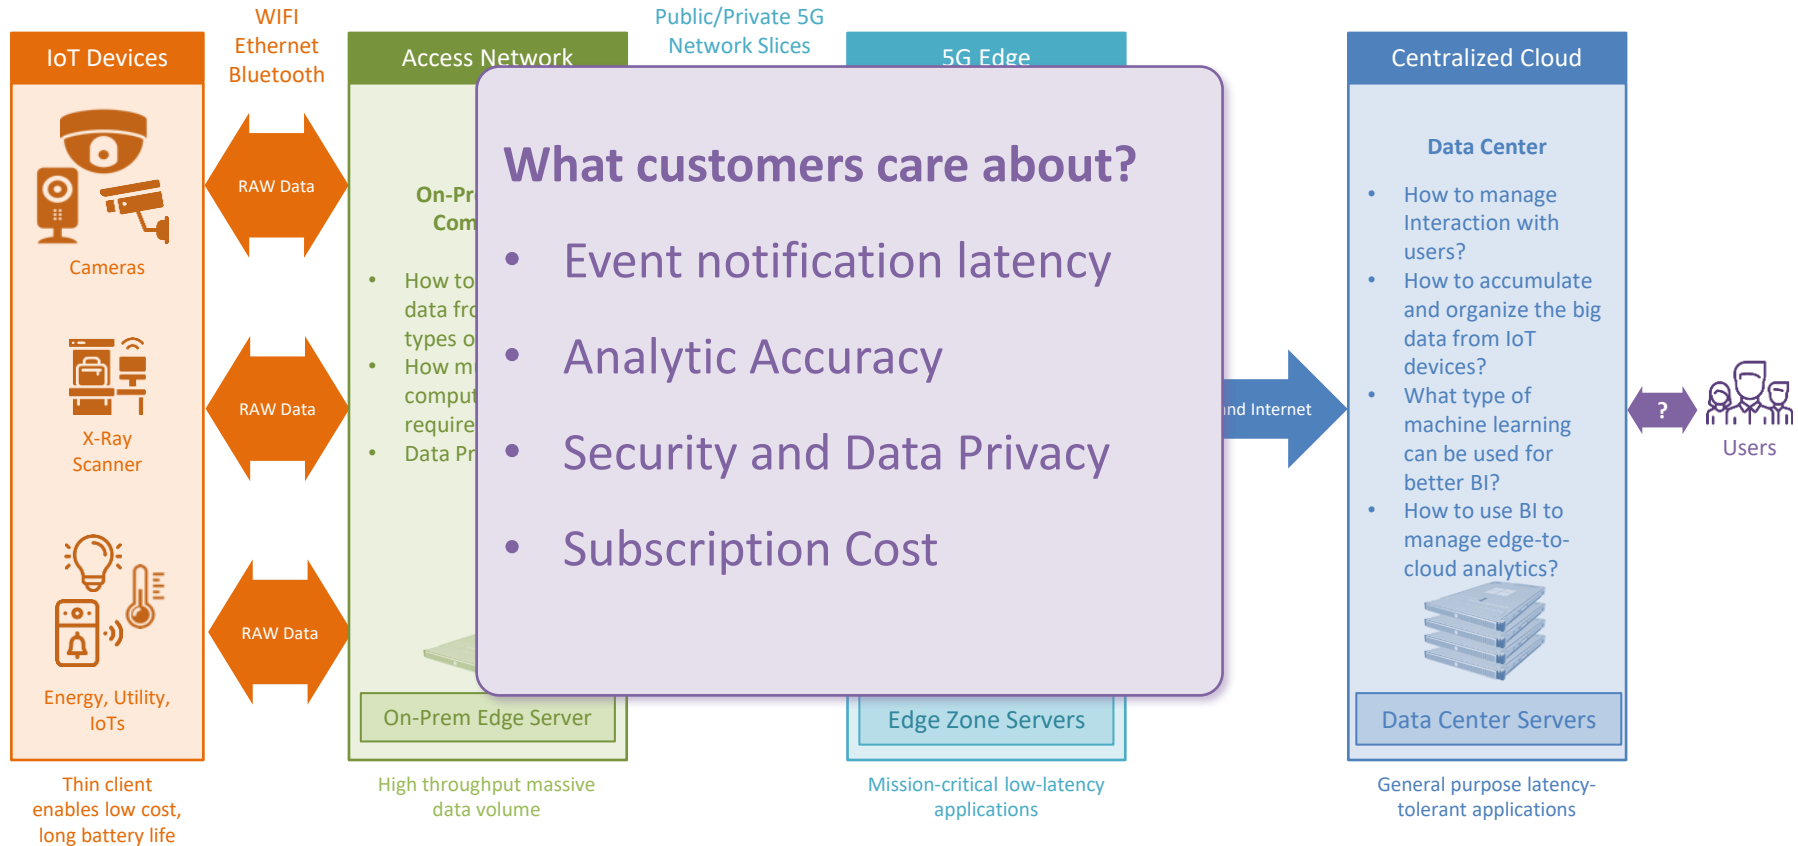

Scenera Business

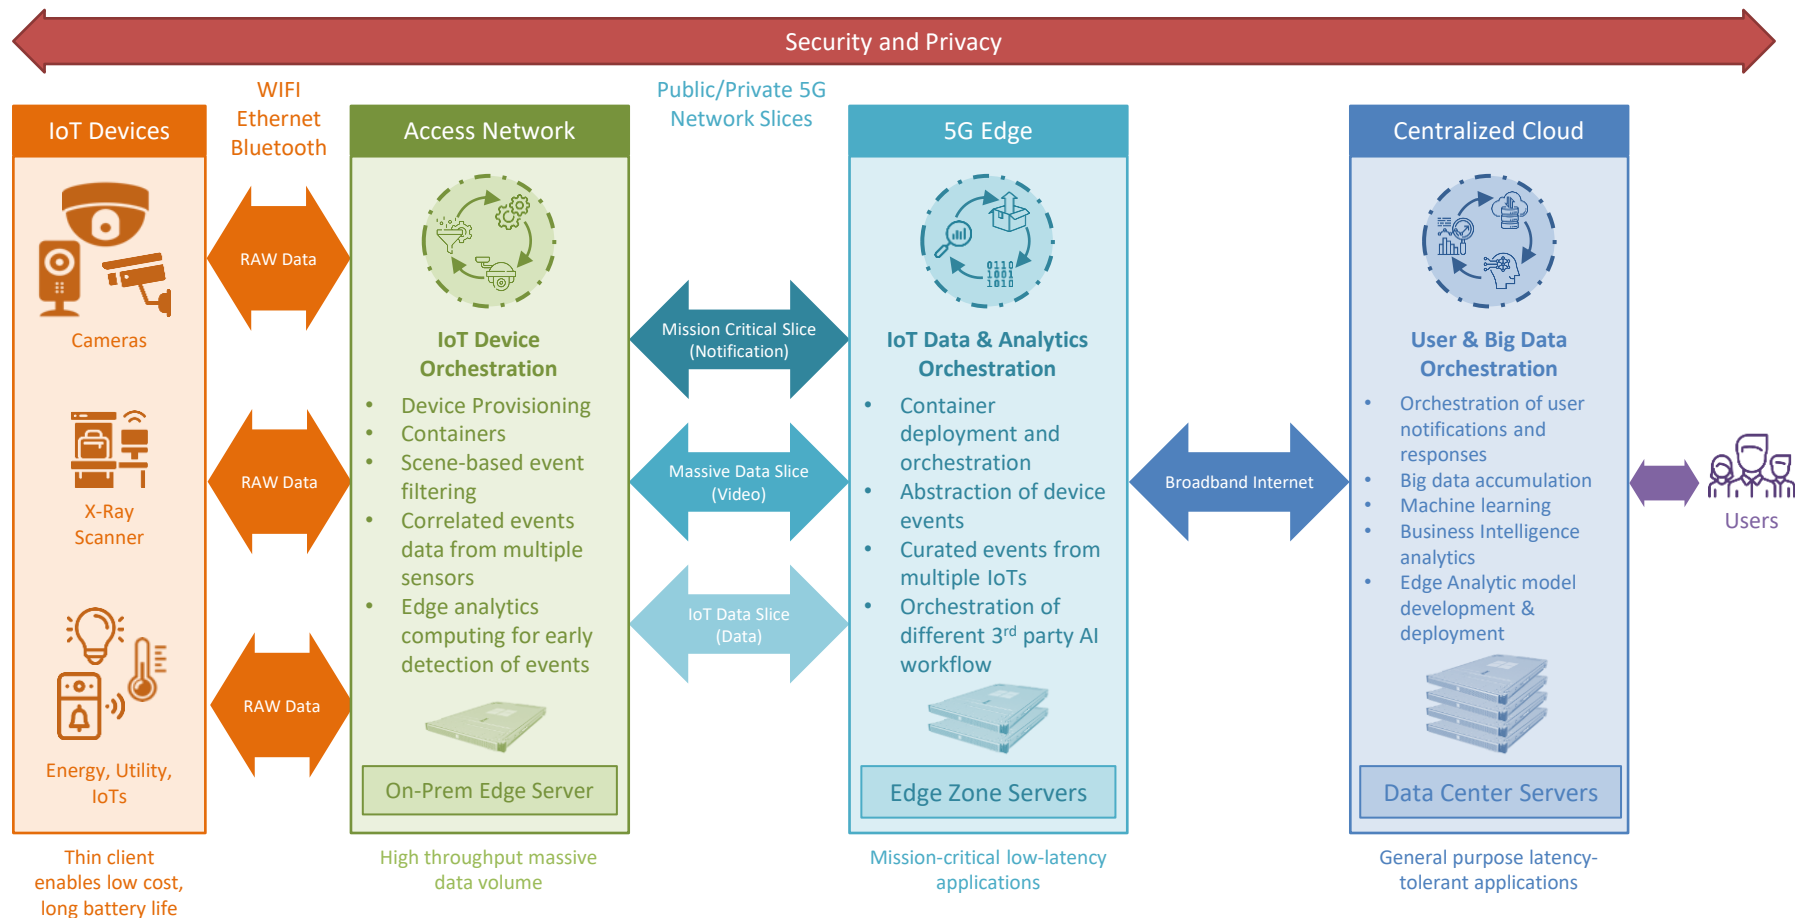

- Scenera intends to provide the platform for systems integrators to provide **event recognition** systems to customers. The platform enables custom AI algorithms to be sourced from any vendor or developed in house.
- Scenera platform
 - allows the definition of workflows for multiple simultaneous applications. The platform is extensible to handle new use cases
 - provide data security among IoT devices, user account and apps accessing user's device and data
 - orchestrates the real-time operation and monitoring of the service performance
